## THE GRS DIFFERENCE

### CHOICE

We believe our clients know their needs best. We work alongside you to develop your individual treatment goals.

### HOLISTIC CARE

Our clinicians work independently with you and also as a team to ensure your care is well coordinated and health goals are addressed in an integrated manner.

### EASE OF ACCESS

We offer options for utilising telehealth and online communication tools to flexibly deliver our services, increase accessibility and reduce travel time and costs.

### VALUE

Our innovative business model reduces running costs and we pass these savings on to you. This means more available funds for other important aspects of your care such as home care, equipment options and community access.
